CHAPTER 343 - ENVIRONMENTAL ASSESSMENT:

In accordance with the "Exemption List for the State of Hawaii, Department of Land and Natural Resources, as Reviewed and Concurred Upon by the Environmental Council (Docket 91-EX-2, December 4, 1991), the subject request is exempt from the preparation of an environmental assessment pursuant to Exemption Class No.1, "Operations, repairs or maintenance of existing structures, facilities, equipment or topographical features, involving negligible or no expansion or change of use beyond that previously existing [HAR § 11-200-8(a)(1)]."

The proposed activity is of a similar type and scope of firework display activities that periodically occurred and continue to occur on this and other beach areas across the State. Such activities have resulted in no known significant impacts, whether immediate or cumulative, to the natural, environmental and/or cultural resources in the area. As such, staff believes that the proposed event/use would involve negligible or no expansion or change in use of the subject area beyond that previously existing.

REMARKS:

Hawaii Explosive & Pyrotechnics, Inc. (Applicant) has requested a right-of-entry onto the subject land for purposes of conducting its 2010 Fourth of July aerial fireworks display at Kauna'oa Beach near the Mauna Kea Beach Hotel. The specific location of the fireworks display firing site is shown on Exhibit B attached.

Prior to 2009, staff issued rights-of-entry to Applicant pursuant to the authority delegated by the Board of Land and Natural Resources at its meeting of September 28, 2001, Item D-4. Then in November 2008, Land Division instituted its permitting system for commercial activities on unencumbered State beaches. This system uses standard conditions that generally do not allow the placement of structures within the permit area. However, Applicant's fireworks displays require the use of firing racks and other equipment within the permit area. Accordingly, Applicant cannot secure the standard commercial beach permit for its fireworks displays. In such situations, Land Division is submitting the requested use of public lands to the Board for approval as a revocable permit. At its meeting of December 11, 2009, Item D-8, the Board approved Applicant's request for use of the subject area for its 2009 New Years Eve display, and Revocable Permit No. S-7542 was thereafter issued and closed out after the conclusion of the event.

Applicant has not had a lease, permit, easement or other disposition of State lands terminated within the last five years due to non-compliance with such terms and conditions. A revocable permit is more appropriate than a long-term disposition in light of the single date requested for the fireworks display.

No comments were solicited from other government or community agencies because there is no change to the use of the area from prior years.

There are no other pertinent issues or concerns. Staff has no objection to the request.

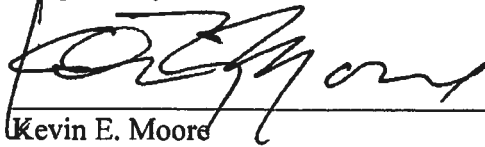

RECOMMENDATION: That the Board:

1. Declare that, after considering the potential effects of the proposed disposition as provided by Chapter 343, HRS, and Chapter 11-200, HAR, this project will probably have minimal or no significant effect on the environment and is therefore exempt from the preparation of an environmental assessment.
2. Authorize the issuance of a revocable permit to Hawaii Explosives &

Pyrotechnics, Inc. covering the subject area for aerial fireworks display purposes under the terms and conditions cited above, which are by this reference incorporated herein and further subject to the following:

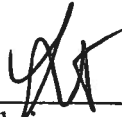

- a. The standard terms and conditions of the most current revocable permit form, as may be amended from time to time;
- b. Review and approval by the Department of the Attorney General; and
- c. Such other terms and conditions as may be prescribed by the Chairperson to best serve the interests of the State.

Respectfully Submitted,

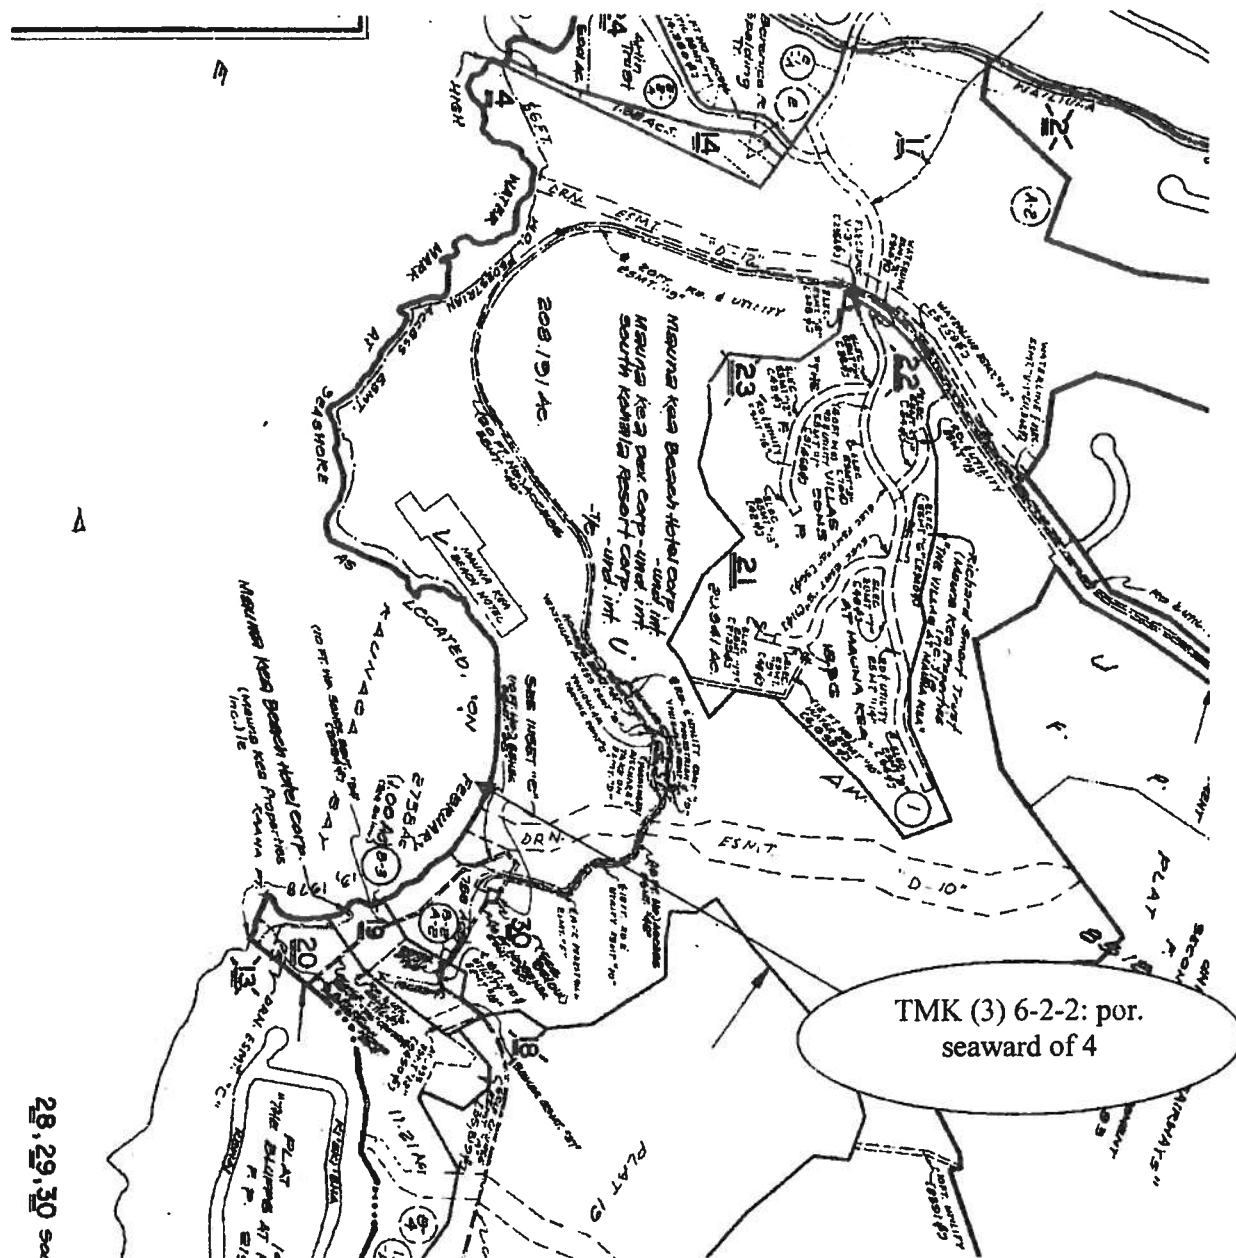

Kevin E. Moore  
District Land Agent
